

Capability Statement

COMPANY OVERVIEW

PGI Steel is a custom steel processing company that has been producing high quality steel products for over 50 years. PGI Steel is unique in that we are a single source solution for custom steel plates and custom steel parts. We have two steel processing facilities that cover nearly 150,000 square feet and manufacture custom steel jobs and specialty fabrication projects per client specifications.

ISO 9001:2015

CORE COMPETENCIES

PGI works with machine shops, engineering firms, machine designers and builders, construction companies, tool & die makers, heavy equipment manufacturers, the automotive and aerospace industries, US Government and more to produce a wide variety of parts that fits your project. We produce and/or recondition precision steel parts such as bolsters, machine bases, press plates, jigs & fixtures, molds, precision parts, structural plates and tools and dies.
